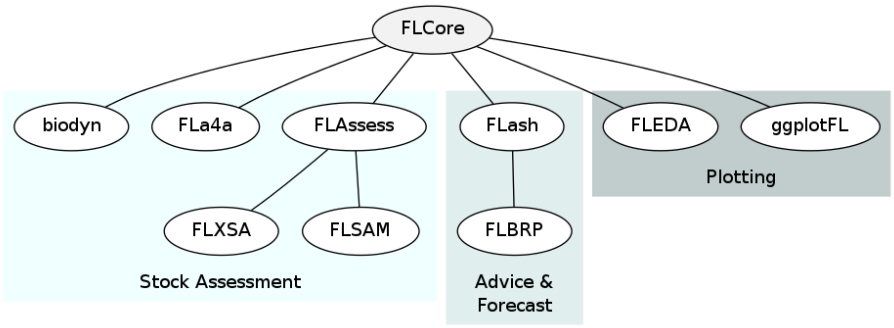
learning: Introduction

FLR in a nutshell



Installing the FLR packages

We start by installing the most recent version of the FLR packages. Most FLR packages are currently not available in CRAN, but are distributed through the FLR Project package repository. To install the first of the packages, *FLCore*, please type:

{% highlight r %} install.packages(c("FLCore"), repos = "http://flr-project.org/R") {% endhighlight %}

Loading data

{% highlight r %} url <- "http://flr-project.org/assets/data/ple4_ca/ple4_ca.csv"

ca <- read.csv(url) {% endhighlight %}
